LinkedIn profile
Dhaka, Bangladesh

CSE student at Daffodil International University who learns by building. I apply programming and algorithm fundamentals to working software and electronics projects, from a deployed evaluation platform to a C++20 Huffman workbench and an Arduino digital ammeter.

PROFILE · 2026

01 TECHNICAL SKILLS

PROGRAMMING
C · Java · Python

CS FOUNDATIONS
OOP · Data structures · Algorithms · Complexity

WEB & DATA (LEARNING)
HTML · CSS · Flask · PostgreSQL · REST-style APIs

TOOLS & PLATFORMS
Git / GitHub · Linux · CMake · Render · Neon · Cloudinary

ELECTRONICS
Arduino · ADS1115 · HC-05 / HC-06 · Relays

DESIGN
Graphic design

03 LANGUAGES

Bengali — Native
English — Working proficiency
Hindi — Conversational

04 EDUCATION

B.Sc. in Computer Science & Engineering — 2025 - Present
Daffodil International University · Dhaka, Bangladesh
Coursework includes programming, object-oriented programming, data structures and algorithms. Applying these foundations through individual software and hardware projects.

Higher Secondary Certificate (HSC), Science — 2021 - 2023
Notre Dame College · Dhaka Board
GPA 5.00 · Notre Dame Science Club member and Annual Science Fair participant.

Secondary School Certificate (SSC), Science — 2016 - 2021
Shamsul Haque Khan School and College · Dhaka Board
GPA 5.00

05 SELECTED PROJECTS

Huffman Hide & Compress — DEPLOYED · C++20
Built a Huffman compression workbench with byte-level encode/decode, animated tree visualization, analytics, secure encrypted packages and RGB-LSB image steganography. The C++ core has 250 passing property checks; best payload reduction reached 85% on test data.
C++20 · JavaScript · Web Crypto · CMake **LIVE | SOURCE**

Analysis Studio — DEPLOYED · FULL STACK
Created an image-evaluation platform for a DIU CSE individual project. Supports evaluator accounts, structured 1–10 ratings, per-person averages, administrative workflows and export-oriented reporting.
Python · Flask · PostgreSQL · Cloudinary · Render **LIVE**

ADS1115 Digital Ammeter — COMPLETED · HARDWARE
Built a digital current-measurement device using an Arduino Nano, ADS1115 ADC, 0.1-ohm shunt resistor and 16x2 I2C LCD.
Arduino Nano · ADS1115 · I2C LCD · Electronics

06 DESIGN & COMMUNITY

- Part-time backup designer for Notre Dame Science Club.
- Part-time backup designer for Naryanganj Student Association.
- Collaborated with friends on college festivals and programs, including National Science Fest and Brain Rain.
- Associate General Secretary, Notre Dame Annual Science Fest (2023); received Honourable Mention.
- Organizer, Notre Dame Annual Science Fest (2022); received Organizing Award.
- Volunteer, Notre Dame Annual Science Fest (2021); received Volunteer Award.
- Lifetime Member, Notre Dame Science Club; participated in the Annual Science Fair.

07 PROBLEM SOLVING

Beecrowd: 30+ problems solved · Ongoing practice in data structures and algorithms.
